

INTRODUCTION

ChemCare Asia Consultants Pte Ltd, working together with Chemwatch, is the premier provider of (M)SDS within the ASEAN/Asian region. The (M)SDS we produce are provided in virtually any language in the region, plus many of the EU languages. In addition the (M)SDS are formatted to meet local legislation on regulations, layout and product classification.

The advent of Globally Harmonized System (GHS) for the classification, labeling and format is now a reality in many countries. These GHS (M)SDS are also being introduced widely within the region.

We offer a service to write (M)SDS based on the minimum data provided, and to provide the (M)SDS to meet both current requirements as well as the future GHS needs. To do so requires input from the client, with some information essential to permit the authoring efficiently, and without the need for frequent dialog between the client and our staff. It is with this in mind that we have prepared the following data input sheet for completion for EACH material requiring an (M)SDS prepared.

Please complete the information below: items marked with (*) must be completed to permit a correct (M)SDS. Thank you!

CHEMCARE ASIA

CONSULTANTS PTE LTD

MSDS Preparation details

*Requestor name			
*Company name			
Requested date			
Required date			
*Additional Language(s) required (if any) <i>(English will be provided as the first copy)</i>
